1. Before You Begin

Dear "Build with Gemini" Event Participants,

Thank you for participating in the "Build with Gemini" Event and taking the opportunity to experience the next generation of AI with Google through the provided business case study.

To complete the lab successfully, please follow the step-by-step instructions provided below and finish all six missions (M0–M5). After completing the missions, take the assessment and score at least 80% to claim your Google AI Skill Badge. Successful completion will also qualify you for **E1 proficiency in AI Agent (6675)**, which is expected to reflect in **iEvolve within 2–3 weeks**.

If you encounter any questions while working through the lab, please refer to the FAQ (FAQ Link) first. If you still need assistance, join the live Teams support session available between 26th Sep, 6 AM IST and 28th Sep, 6 AM IST, where mentors can help you complete the lab.

[Join this Live Link & Complete "Build with Gemini" Event Lab with us. | Meeting-Join | Microsoft Teams](#)

FAQs : Please click the FAQ before reaching live support session. [For FAQ, click here.](#)

*****Attention***:**

We need to create accounts in the below 2 portals to complete the lab and earn the badge.

1. Google Labs for Sales - [Open the Google Labs for Sales profile page](#)
2. Google skills for partner – Claiming badge and assessment: [Create Google Partner Account](#)

2. How to Sign Up

Step 1: Open the portal

Open <https://explore.qwiklabs.com/discovery> to see the below Webpage

← ↻ https://explore.qwiklabs.com/discovery

Google Labs for Sales

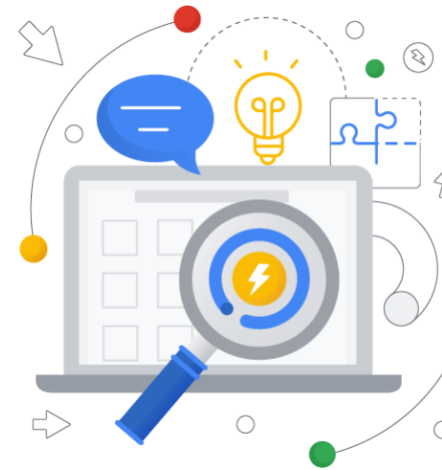

Home

Catalog

Welcome to Google Labs for Sales!

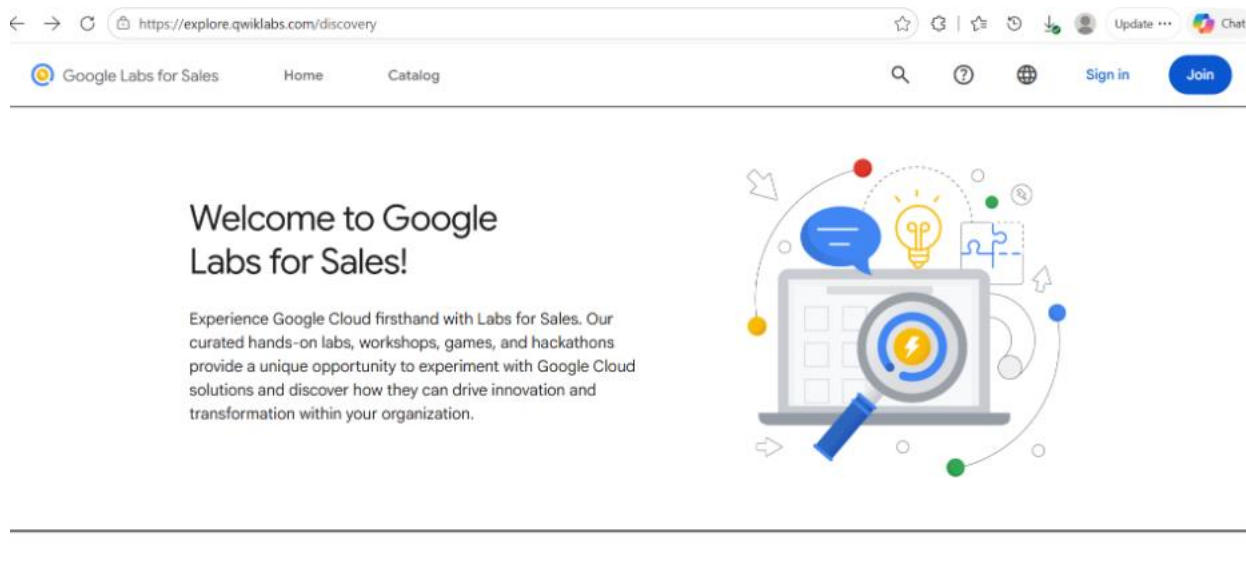

Experience Google Cloud firsthand with Labs for Sales. Our curated hands-on labs, workshops, games, and hackathons provide a unique opportunity to experiment with Google Cloud solutions and discover how they can drive innovation and transformation within your organization.

Step 2: Create your learner profile

a: Click on the web link to access the Lab page for the “Build with Gemini” Event as shown below :

<https://explore.qwiklabs.com/discovery>

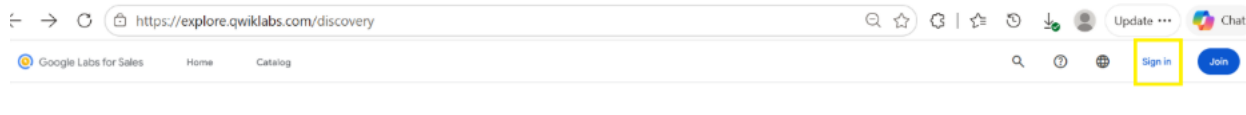

b: Sign in to Google Lab through TCS Credentials

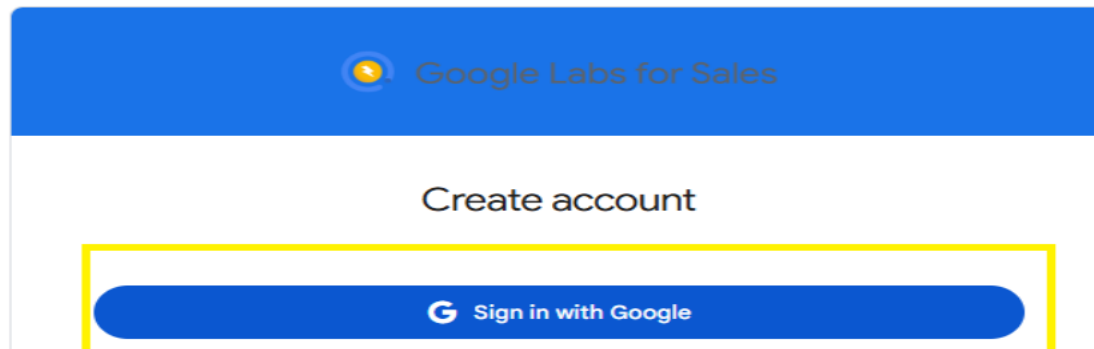

Do not use a Personal Gmail or Client Email for Creating Account and always use TCS Mail Id

Click on “**Sign in**” at the top Right corner of the page to view the below Page.

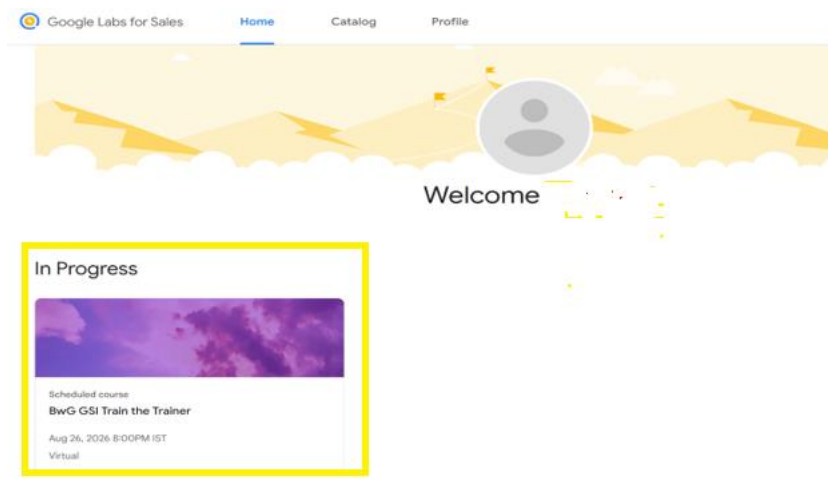

Then, click “Sign in with Google” link, if you have already done any learning in Google Partner Portal (for which you would have already created Google Partner Account using TCS Mail in the past)

Then click on “**Sign in with Google**”

Once you click on “Sign in with Google”, it will automatically show you “In Progress” Course Link at the Right Bottom of that Page to access “Build with Gemini Lab” or it will ask you to enter your TCS email id (Use Eg. balas.aman@tcs.com ,not Eg. 9999999@tcs.com), authorize it before showing you “In Progress” Course Link at the Right Bottom of that Page to access “Build with Gemini Lab”

In case you have not done any learning using Google Partner Portal before, then Click the “Create account” in the “**Sign in**” Page as mentioned below.

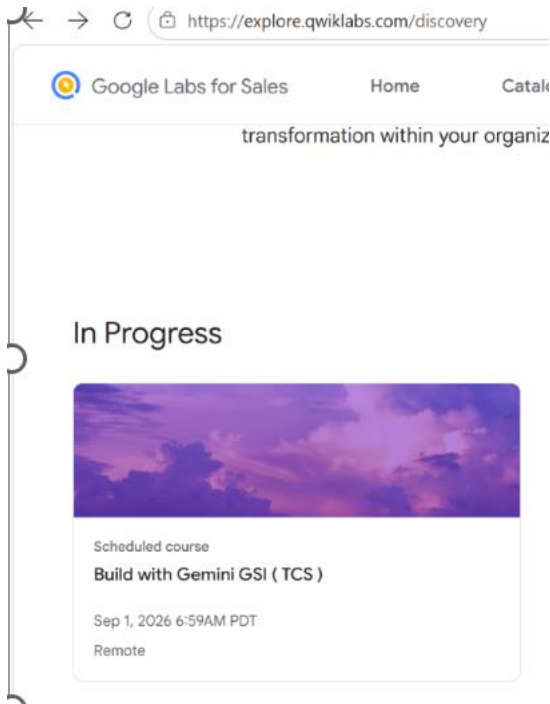

Then click on “**Create Account**”

Enter all the details and click on **“Create Account”**. Kindly ensure that you are entering the email id as TCS Email Id (Use Eg. baaa.raaa@tcs.com ,not Eg. 9999999@tcs.com) and make sure not using the same password as used for TCS login, as it would be security compliance.

Please use different password and be advised to give dummy DOB while creating this account.

Once you have successfully logged in, you will see “In Progress” Scheduled Course. Access Link at the Left Bottom of that Page to access “Build with Gemini Lab”.

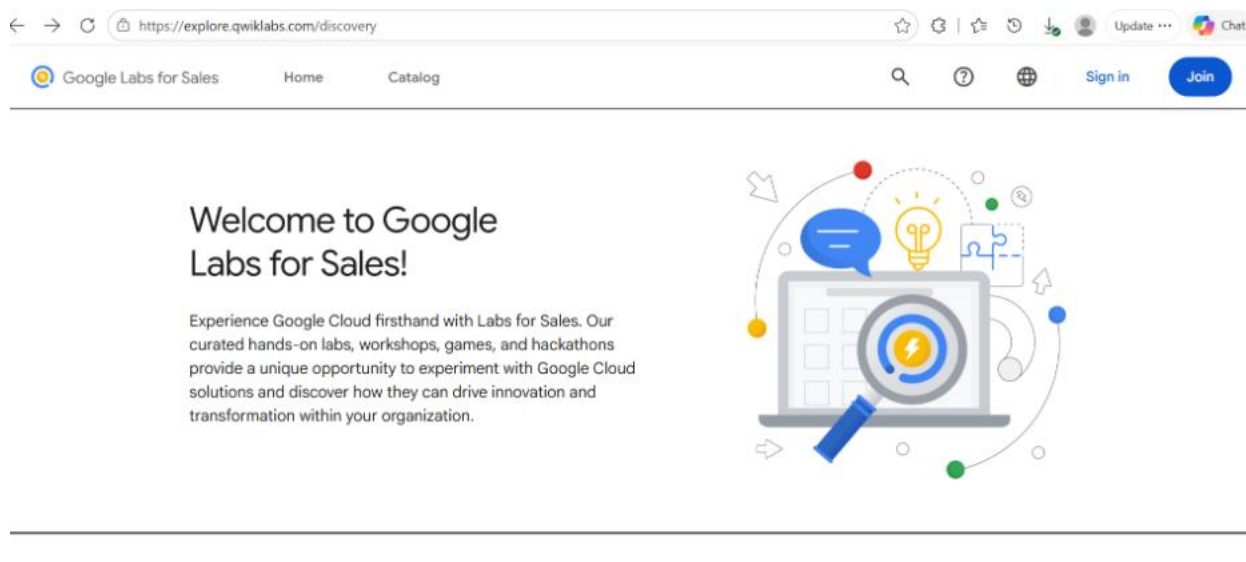

While Creating the Account, in case it shows that your email id already exists, then click on **“Sign with Google”** in **“Sign in” Page** and login through TCS Mail Id.

In case you cannot access the lab in your TCS machine or Client machine due to Proxy/Firewall restrictions at your place, then try to complete the activity using your personal machine to access this Lab. Below are the steps to login through Personal Machine.

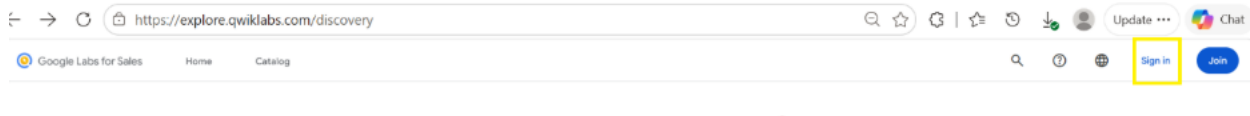

Use of Personal Machine to Access the Lab

If you use your personal machine type the web address manually the given URL:

<https://explore.qwiklabs.com/discovery>

Then click on **“Sign in”** at the top Right corner of the page.

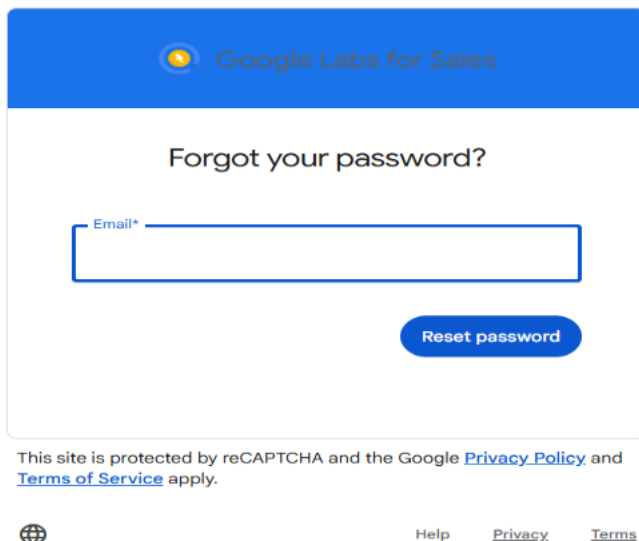

If you remember the user id and password, then enter it. If not, click on **“Forgot password”** as shown below.

For Forgot Password as shown as below screen, it will ask you to enter the TCS email id (Use Eg. baaa.raaa@tcs.com , not Eg. 9999999@tcs.com)

Once you enter the TCS email id, click on the reset password (Don't use the same password used for TCS ultimatrix/system login). You will receive a link to change your password. Click on the link and change your password. (If you access your TCS emails through TCSMYAPPS then you will have to forward that email to your client email id since no application or weblink will open inside TCSMYAPPS)

While trying to reset the password in case of a 'Forgot Password', if it says **“user id not found”** then we will need to create an account. So please click on **“Sign in”** and then click on **create account using** TCS email id (Use Eg. baaa.raaa@tcs.com ,not Eg. 9999999@tcs.com)

3. Navigate to the Build with Gemini Lab

Step 3: Open the assigned course

- From the dashboard, locate the Scheduled Course under In-Progress. The displayed wording may vary slightly.

- Open Build with Gemini GSI.

- After clicking on the lab: Build with Gemini GSI, You will see the below page

Lab setup instructions and requirements

Start Lab

04:00:00
Time limit

Build with Gemini GSI

⌚ 4 hours 🚫 No cost

★★★★★ Rate Lab

ⓘ This lab may incorporate AI tools to support your learning.

Setup and requirements

Before you click the Start Lab button

Read these instructions. Labs are timed and you cannot pause them. The timer, which starts when you click **Start Lab**, shows how long Google Cloud resources are made available to you.

This hands-on lab lets you do the lab activities in a real cloud environment, not in a simulation or demo environment. It does so by giving you new, temporary credentials you use to sign in and access Google Cloud for the duration of the lab.

Lab instructions and tasks

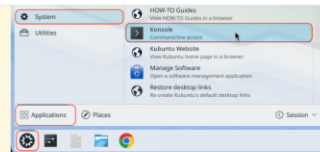

Setup and requirements

Platform Builders Track: How to Build, Scale, Govern and Optimize Enterprise Agents

- Scroll down to bottom of the page on the Right side (“Build with Gemini GSI”) to find the: Platforms Builders Track and click the link

Lab setup instructions and requirements

Start Lab

04:00:00
Time limit

- Run the command to start Antigravity Environment `/opt/venv/bin/python3 /config/automata/bin/ag_auto_login.py --force`
- Wait for the Antigravity Environment to available, do not interrupt the script execution.
- Once setup execution is completed, you should see the Antigravity Environment available for use.

Platform Builders Track: How to Build, Scale, Govern and Optimize Enterprise Agents

For this track use steps at [Platform Builders Track](#)

Platform Builders Track: How to Build, Scale, Govern and Optimize Enterprise Agents

Snapshot 3. Dashboard to Build with Gemini GSI and Platform Builders Track.

If you cannot find the track, confirm that you signed in with the same corporate email used for event access. Check In progress, Scheduled, and the bottom portion of the course page before raising an access issue.

4. Instructions for the Lab

Step 4: Start and complete the lab

- Read the scenario, lab setup, and all prerequisites before Click the “Start Lab” Green Colour Link on the Left side of the Page.

Lab setup instructions and requirements

Start Lab

04:00:00

Time limit

Setup and requirements

Before you click the Start Lab button

Read these instructions. Labs are timed and you cannot pause them. The timer, which starts when you click **Start Lab**, shows how long Google Cloud resources are made available to you.

This hands-on lab lets you do the lab activities in a real cloud environment, not in a simulation or demo environment. It does so by giving you new, temporary credentials you use to sign in and access Google Cloud for the duration of the lab.

To complete this lab, you need:

- Access to a standard internet browser (Chrome browser recommended).

Note: Use an Incognito (recommended) or private browser window to run this lab. This prevents conflicts between your personal account and the student account, which may cause extra charges incurred to your personal account.

Lab instructions and tasks

Setup and requirements

Platform Builders Track: How to Build, Scale, Govern and Optimize Enterprise Agents

- When you are ready, click “Start Lab”. The timer begins immediately.

Key points to ponder:

The lab environment remains active for **4 hours** once started and **cannot be paused**.

Most learners complete all six missions to successfully complete the lab in **about 2 hours**.

After completing the missions, pass the quiz **80% or higher** to earn your **Skill Badge**.

Once you earn the badge, you may click “End Lab” in Red Color link to stop the lab from releasing the environment.

Lab instructions and tasks

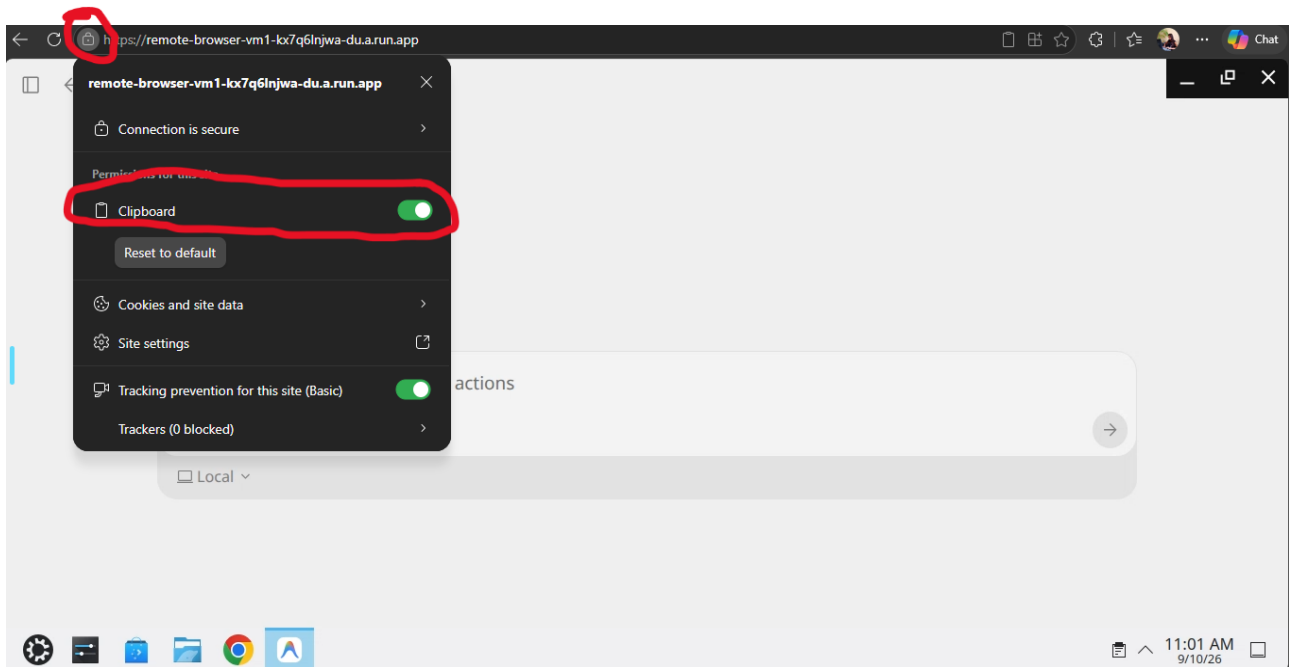

Setup and requirements

Platform Builders Track: How to Build, Scale, Govern and Optimize Enterprise Agents

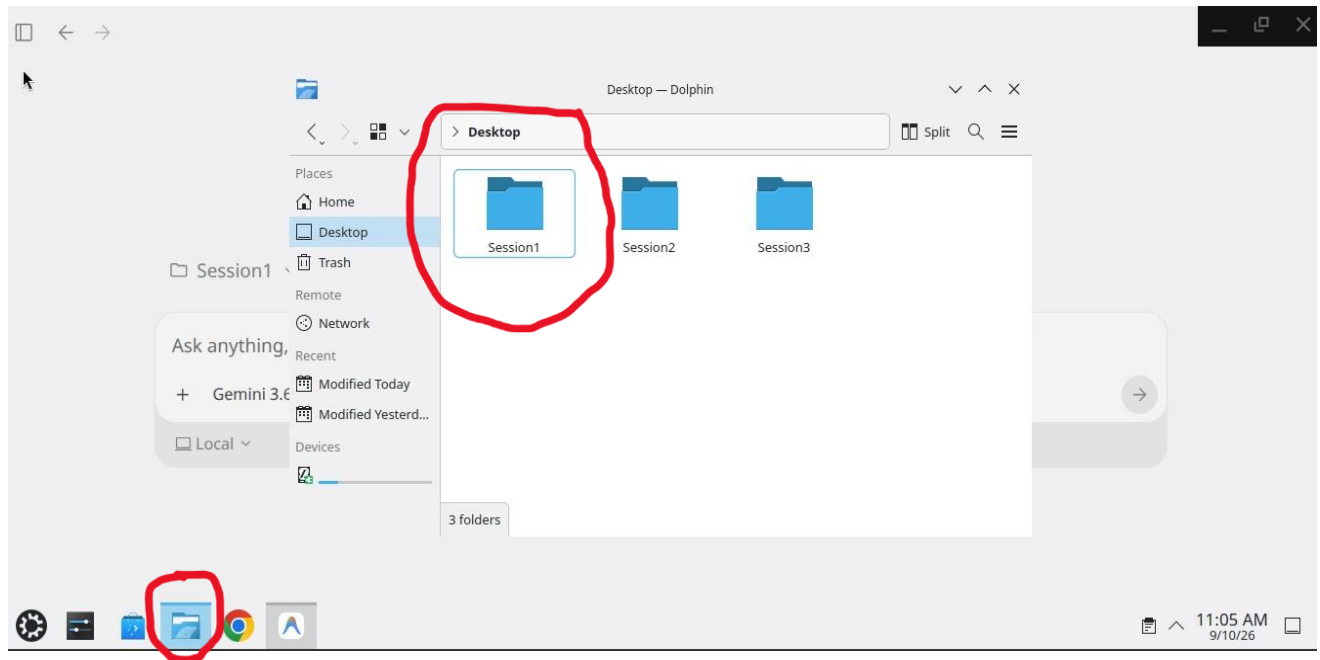

- You must copy the Antigravity Environment URL for remote sessions from the left-hand side lab panel and paste it into a new tab.

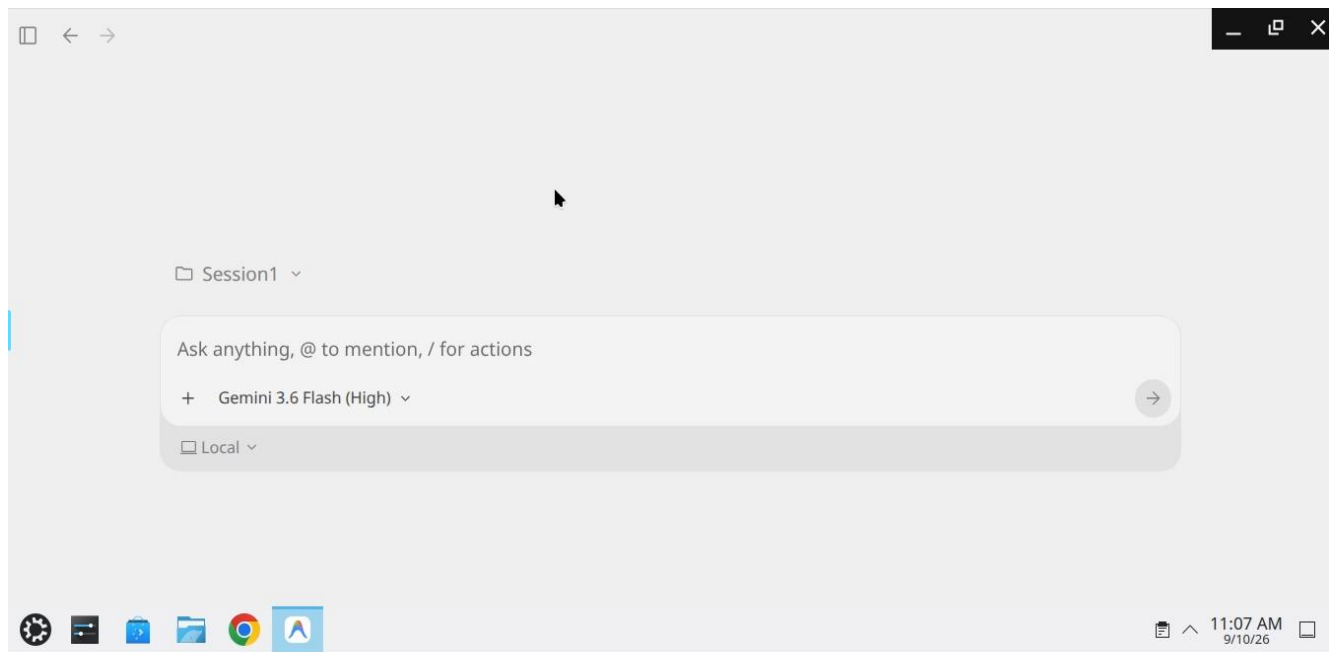

- Once you will open a new tab with Antigravity Remote Session URL, Make sure the clipboard option is always enabled in your Antigravity IDE. (The below pop up will be opened on clicking left corner icon before we are entering URL)

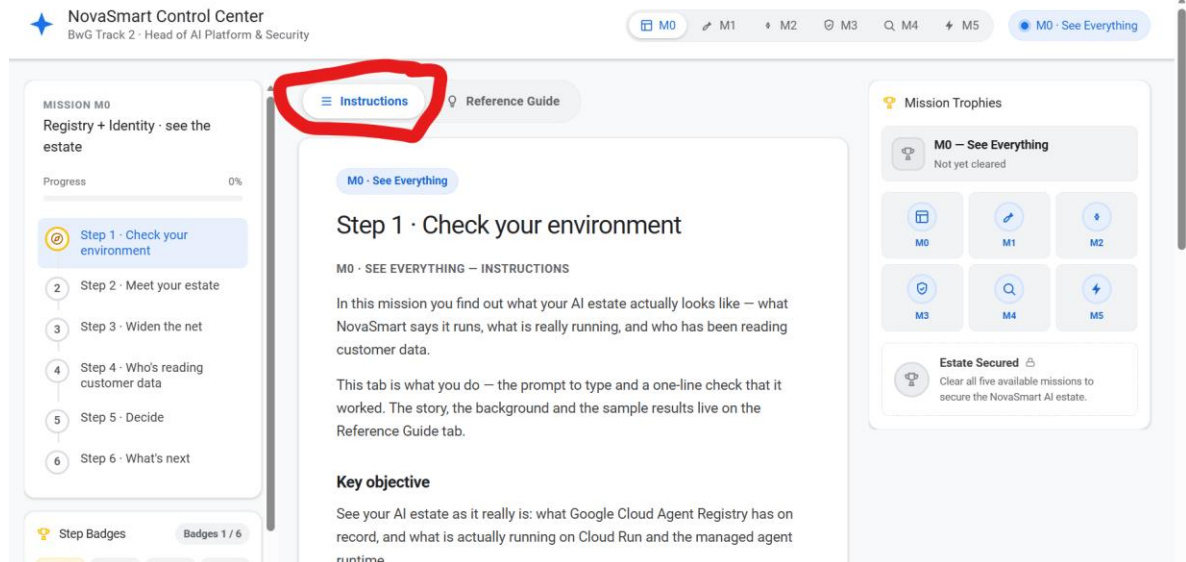

- Once the Antigravity (AGY) screen is opened, please look for the 'Session1' folder that is enabled before starting the lab by default. ?
- **If the "Session1" folder is not opened by default**, then click on the folder icon from bottom left and select a session as shown in the below snap.

Then, 'Session1' folder will be enabled for the chat as below,

- Now click on the Platform builder to link back, then you will be redirected to the new window with Instructions.

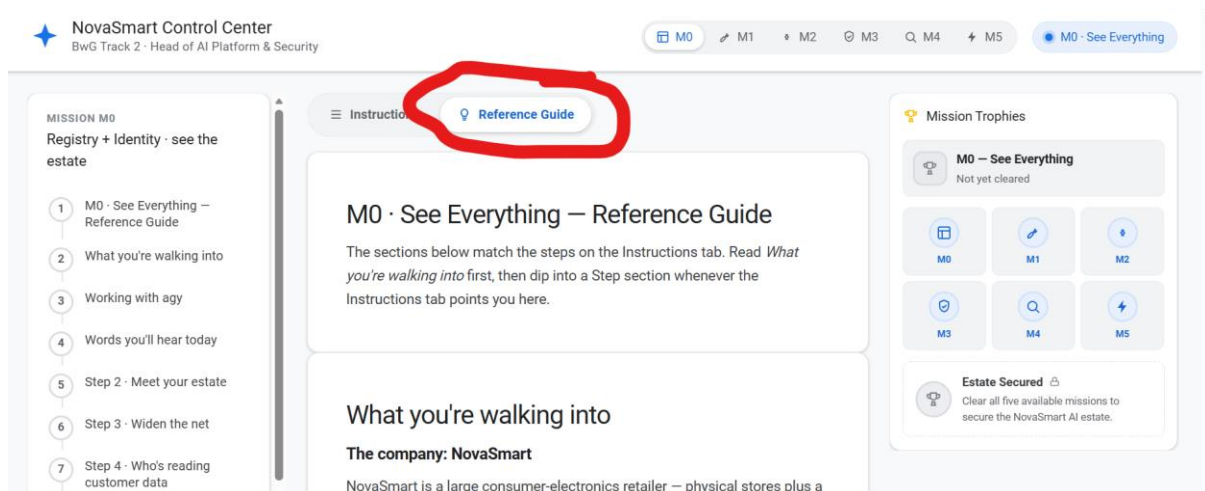

5. Reference for the Lab

- **Lab Setup:** Use this to understand the temporary environment and access details.
- **Intro video:**

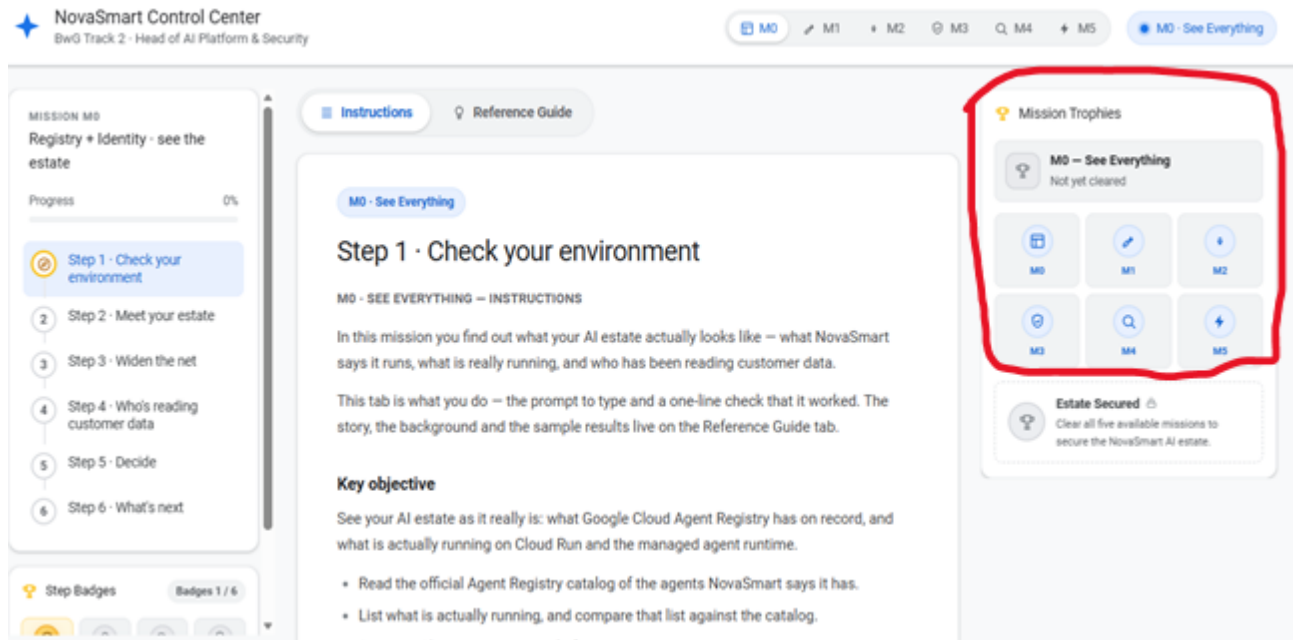

Please use the introduction video ([Copy of bwg_track2_gsi_intro.mov](#)) below to understand the business case or problem statement we will be resolving in this lab. You will also see this in detail in Reference Guide shown in the Page below (Don't worry if incase below video is not opening for you)

Note: Lab URL used in the intro video is obsolete and so, please continue using the given lab URL (<https://explore.qwiklabs.com/discovery>)

- **Mission instructions:** The lab page is the primary source of truth for M0 through M5.

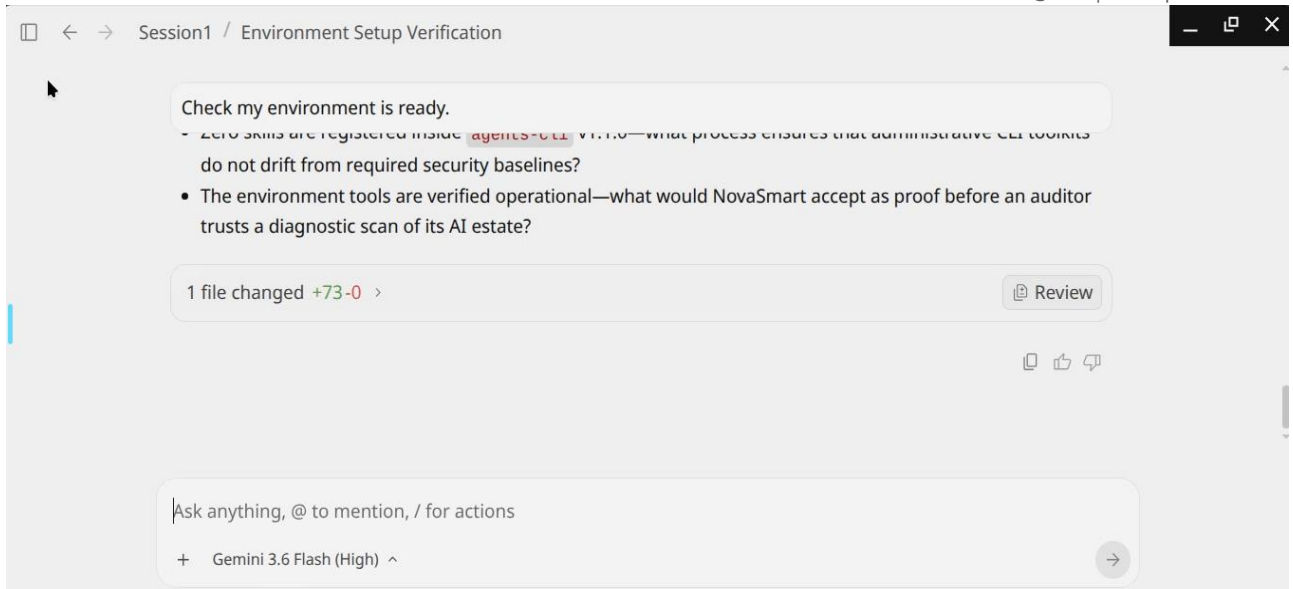

- Complete the missions sequentially from M0 through M5.

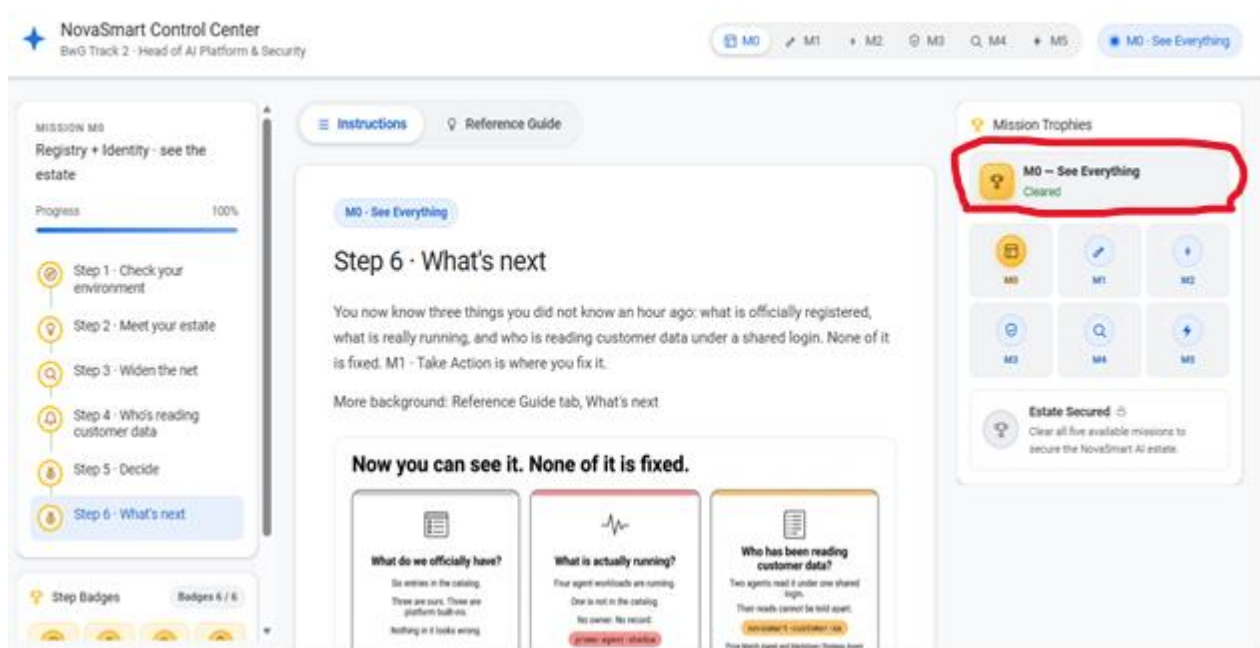

- Read each mission fully, follow the provided prompt or action, and use the mission progress check or trophy indicator.

- Ensure that every task is completed successfully. Once the task is completed successfully, it will be shown as below,

- Ensure that once completed every mission it shows cleared in 'Mission Trophies' section as shown in below snap,

- Scenario explanation: Go through both the instructions and the reference guide given from Mission M0 through M5.

Snapshot 4. Start Lab, timer, instruction panel, and temporary environment details.

Recommended participant working method

Action	What to do
Read	Read the mission objective and every numbered instruction.
Execute	Perform only the requested action using the supplied lab values.
Continue	Proceed to the next mission only after the current mission is complete.

6. Mentor guidance through Live Support channels for Each Cohort:

Use mentors for blockers and clarification, not to skip steps. Report access failures, mission errors, and repeatable workarounds with screenshots in the live event link shared for Each Cohort. Each Live Link will be accessible for 6 Hours during the specific time mentioned and not all time. Use the Right Live Link based on Current time.

Live Support Channel: You have received the live support team link in the mail for any queries.

What to capture when reporting an issue

- Mission number and exact step.
- Full screenshot showing the error and browser page.
- Whether you use a TCS, client, or personal device.
- Browser and whether private/incognito mode are used.
- Whether the task remained running, failed, or was queued.
- The workaround attempted and the observed result.

7. Highlights to Be Noted

Highlight	Participant guidance
Timed session	Start only when you can work continuously. The lab cannot be paused after launch.
Single-session completion	Complete M0 through M5 in one active session. An expired or ended session requires a fresh start.
Multiple attempts	Users may try again multiple times within the enabled access window (Sep 16 th - Sep 21 st).
Follow the order	Complete Lab Setup first and proceed sequentially through the missions.

Temporary credentials	Use only the credentials and project details generated for the current lab session.
Console verification	For later missions, manually verify the required runtime or agent result in Google Cloud Console when instructed.
Data protection	Use only supplied lab data. Do not enter TCS-confidential, client, personal, production, or project data.
Badge journey	Complete all missions, claim the event completion badge, and complete the post-lab knowledge assessment. The walkthrough stated that a score above 80% is required for the skill badge.
Evidence	Retain screenshots of mission completion, final completion, and badge or assessment status for any later references.

8. Completion Checklist

The screenshot displays the Gemini Enterprise Agent Platform interface for Mission M5, titled 'Measure before you go live'. The mission progress is at 0%. The left sidebar shows a list of steps: Step 1 (Run the evaluation and read the scorecard), Step 2 (Build a tougher set and run it), Step 3 (See the fix before you make it), Step 4 (Make the change and see what is actually running), and Step 5 (Claim your badge). The main content area shows the 'M5 - Evaluate and Decide' instructions, including a key objective to score the price-match agent's actual behaviour against the price-match policy. The right sidebar shows a grid of mission icons (M0 to M5) and a section titled 'Earn Your Badges' with two available badges: 'Event Badge' (Build with Gemini) and 'Skill Badge' (Google Cloud). Both badge sections have a 'Claim' button circled in red.

- ☐ I signed in using my corporate learner account.
- ☐ I opened Build with Gemini GSI and Platform Builders Track.
- ☐ I read Lab Setup before starting.
- ☐ I started only when uninterrupted time was available.
- ☐ I completed M0, M1, M2, M3, M4, and M5.
- ☐ I verified required outputs and progress checks.
- ☐ I captured screenshots of final completion and badges.

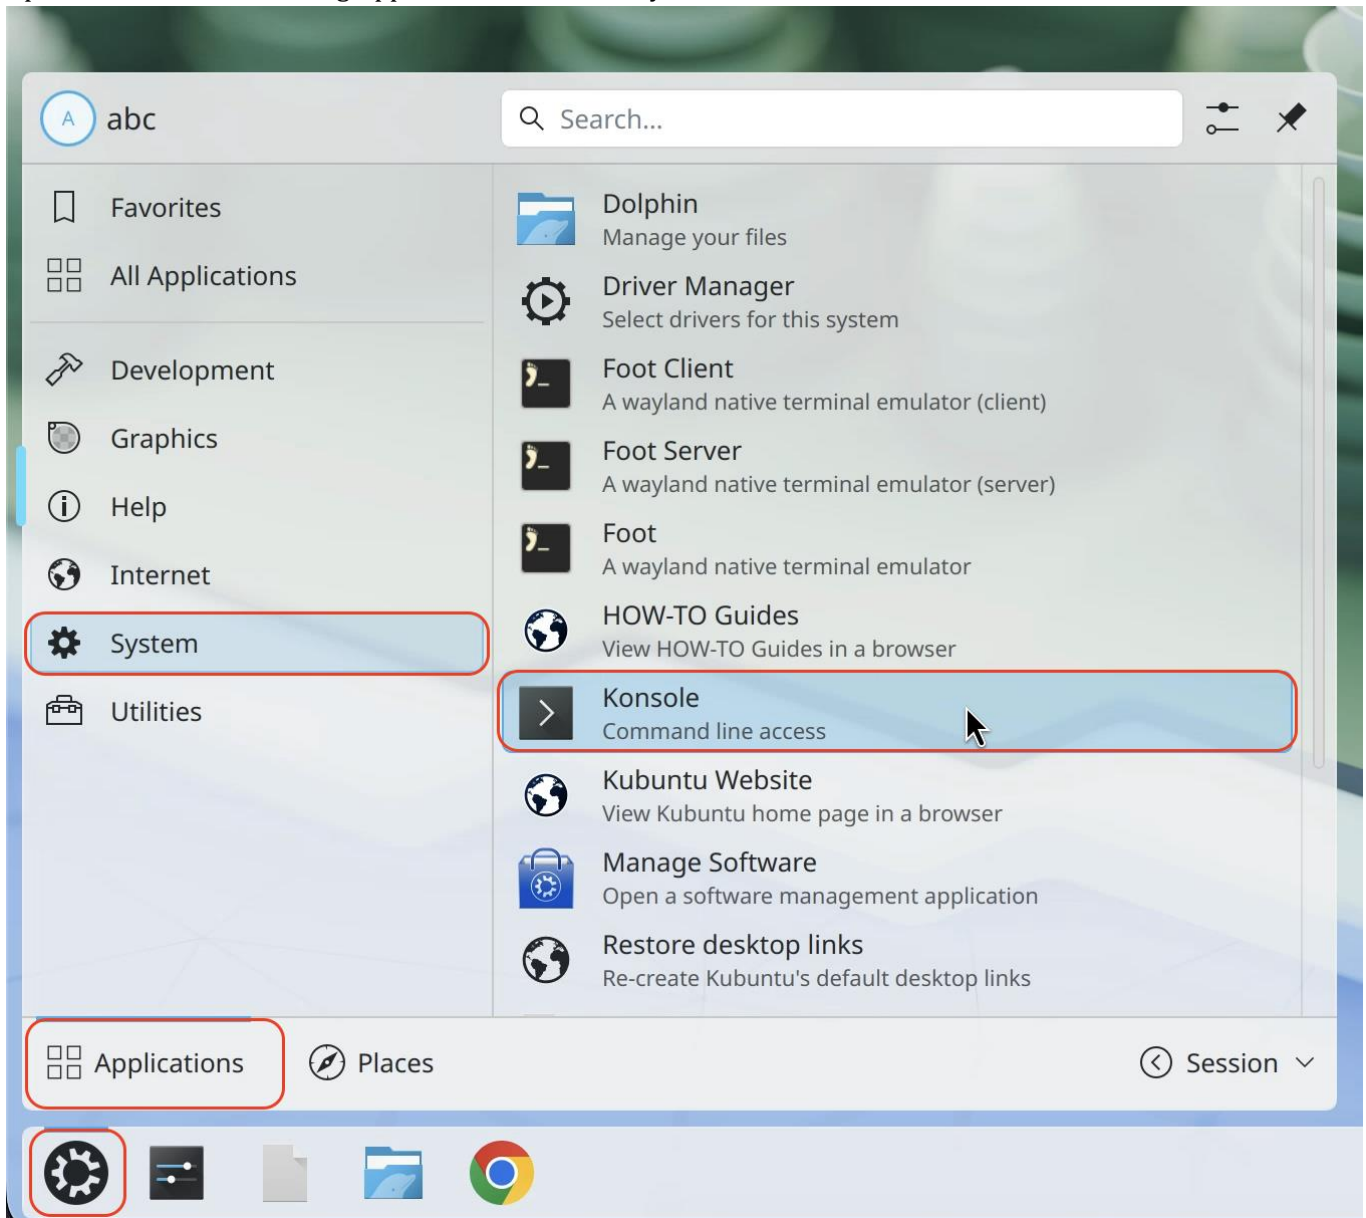

☐ I completed the post-lab assessment.

9. Known Issues

Issue: Anti-Gravity Application Closed Accidentally

If you have accidentally or unknowingly closed the Anti-Gravity application, follow the steps below to reopen the application.

- Open Konsole terminal using Application Launcher - System - Konsole

- Run the command to start Antigravity Environment `/opt/venv/bin/python3 /config/automata/bin/ag_autologin.py --force`
- Wait for the Antigravity Environment to be available, do not interrupt the script execution.
- Once setup execution is completed, you should see the Antigravity Environment available for use.

Hope you all successfully completed the Mission (M0 to M5) and acquired the Skill Badge. Congratulations !!!

10. FAQs:

1. How do I open the lab?

Answer: Please follow the instructions provided in the guide step by step to open and access the lab environment.

2. I have opened the lab, but I am unable to find the instructions. Where can I find them?

Answer: You can find the **Platform Builder Track** link as shown in the screenshot below.

Platform Builders Track: How to Build, Scale, Govern and Optimize Enterprise Agents

For this track use steps at [Platform Builders Track](#)

Click on the link to open the lab instructions and follow the steps provided.

M0 Mission: This mission provides context for the organization, the scenario, and the existing agents.

M1 onwards: You will work on identifying and fixing issues with the agents based on the given scenario.

Please go through the **scenario carefully** to understand the challenge before starting the tasks. Also, read the **instructions, prompts, and expected responses** carefully before proceeding with each step.

3. I am unable to find Antigravity. I can only see Chrome. What should I do?

Answer: Please check the **bottom taskbar**. You should see the **Antigravity** icon there. Click on the icon to open Antigravity, where you can run your prompts.

4. The screen has been blank or black screen for a long time. What should I do?

Answer: Please refresh the browser and continue with the steps.

5. What should I do if a job continues running for a long time?

Answer: If a job continues running for an extended period, hover over the job to locate the **Cancel Task** icon and click **Stop Task**. Once the task has been stopped, you can proceed with the next steps.

6. What should I do if the Antigravity environment is accidentally closed?

Answer: Click **Settings**, open the **Console**, and run the command provided below to reopen the environment. Please ensure that below command is copied as such. No trail space is added or removed anywhere.

```
/opt/venv/bin/python3 /config/automata/bin/ag_autologin.py --force
```

Note: Please ensure that the command is entered on a **single line**. There should be a **space after python3**, and **no additional or unwanted characters should be included in the command**.

The required option will be populated automatically. Click **Sign In** to reopen Antigravity. The **Project ID** will also populate automatically.

Once the environment is reopened, you can continue from the step where you left off.

7. Will we receive an event badge after completing the event?

Answer: No. Only the **Skill Badge** will be provided as part of this event.

8. After clicking the badge, I am redirected to a page asking me to sign up. What should I do?

Answer: If you do not already have an account, please complete the **Sign-Up** process. If you already have an account, you can **Sign In**.

If you receive an "Invalid email ID or password" error, please try using the **Forgot Password** option and then sign in again.

Please complete the **Build with Gemini** course to earn the badge. Accepting the badge through **Credly** is **optional**.

If you choose to accept the badge through Credly and do not have a Credly account, you can create one. If you already have an account, simply sign in and accept the badge.

9. Do I need to complete both tracks?

Answer: No. Completing **one track is sufficient**. The **Platform Builder track is mandatory**.

If you are interested in learning further, you may also attempt the **App Builder track**.

10. What should I do if lab provisioning is taking longer than expected?

Answer: Lab provisioning may take longer when the **maximum concurrent usage limit has been reached**.

Please wait until a slot becomes available and the lab is allocated to you.

If a slot is not immediately available, please try again after some time.

11. What should I do after claiming the badge?

Answer: Once you have completed the lab and claimed the badge, please **end the lab session** so that the environment becomes available for other participants.

12. Do I need to update my badge completion status in ievolve?

Answer: No. Your completion status will be **updated automatically in ievolve**. No action is required from your end.

13. How it reflects in iEvolve?

Answer: TD will be receiving attendance list from google and the same will be updated in E1 under Agents competency 6675 after 2 weeks. Though you need not take any action further.

14. How many attempts are allowed?

Answer: Multiple attempts are allowed. However, once the session is ended, while provisioning next time, need to start from scratch(M0) and CANNOT be start from where you left.

11. What Next post this “Build with Gemini” Event:

You can Kickstart Learning & Acquire Google Gemini Certification to Build a Strong Gemini Talent Pool in TCS.

Dear AI Learner,

We recently launched "**Daily Bootcamp on Google Gemini Certification (details below)**", part of building a Certified Google Gemini Talent Pool in TCS.

This bootcamp will provide associates an opportunity to understand concepts & labs to kickstart their learning journey towards acquiring this certification.

You can find complete details on Google Gemini Certification Program in the link [Gemini-Enterprise-Certified-Program.aspx](#).

You can also find the details of Daily Bootcamp, Process for Learning and Obtaining Google Gemini Certification, Helpdesk to clarify Queries mentioned below in this mail.

Associates can achieve E2 Proficiency in Gen AI (6686) by attending one of the Daily Bootcamp sessions (details below) + acquiring a Google Gemini Certification (Process for Learning and obtaining Google Gemini Certification mentioned below).

Prerequisites to Join this Program: E1 Proficiency in Gen AI under one of the competency ids : 6618,6686,6675,6678,6632,6700,6720,6772,6803,6812,6645,6826.

If not acquired E1 => Self Learning Path to achieve GEN AI E1 through Competency ID : 6618 -> Path 2 -> Udemy Course + Assessment -> ~ 8 Hours of Learning

Who should participate: Developers/Engineers, Architects, and Consultants seeking to build expertise in Google Gemini Enterprise and contribute to Future AI Deployments. Others with an good understanding of the Software Development/Deployment Process and Coding skills to write/understand code may also join.

Daily Bootcamp on Google Gemini Certification (Repeated Session):

3 PM - 5 30 PM (IST)

9 30 PM - 12 AM (IST)

Join "Google Gemini Certification Bootcamp" for AI Deployments. Don't Miss. | Meeting-Join | Microsoft Teams

Join "Google Gemini Certification Bootcamp" for AI Deployments to become Gemini Certified. | Meeting-Join | Microsoft Teams

Process for Learning and Obtaining Google Gemini Certification :

I. Google Partner Account Creation:

✅ Create your Google Partner Account (**if not created before**) through 👉 [Create Google Partner Account](#) (Use TCS Email ID Only for Account Creation)

II. Learn: Self-learn at your own pace and acquire Google Gemini Enterprise Agent Development Certification(Cert 1) First. Completing this Certification along with Attending the Google Gemini

Bootcamp mentioned above will help you Earn E2 Prof. in Gen AI. Post that you can learn Gemini Enterprise Agent Deployment Certification (Cert 2).

- ✓ No Registration Required. You can Kickstart your Certification Learning Journey immediately through Accessing the Google Gemini Certification Learning Portal : [👉 Gemini Certification Learning Portal](#)
- ✓ Each Certification will have 3 Modules Containing 1) Learning Path (Learn through Courses/Labs/Quiz) 2) Challenge Labs/Skill Badge (Assessment).
- ✓ Ensure completing the Learning in the Learning Path before taking up Assessments through Challenge Labs/Skill Badges.
- ✓ To Acquire a Certification, You must mandatorily complete Assessments through Challenge Labs/Skill Badges from each of the 3 Modules belong to that Cert.
- ✓ Once you Complete all 3 Challenge Labs for a particular Certification, you can be able to view certificate in Credly Portal / Delivery Readiness Portal in 1 Week and E2 Proficiency through Competency : 6686 in iEvolve by 2 Weeks.
- ✓ No Vouchers/Proctored Exams required to acquire the certification. Lab is integrated in Cert. Learning Curriculum for Learning. No Lab License required.

We had also Launched 1. Helpdesk (Teams/Google) 2. Daily Query Clarification Sessions on "Google Gemini Certification" to enable Associates to reach out to us for any Queries regarding a) Google Gemini Certification Program b) Technical queries they encountered during their Google Gemini Certification learning journey.

HelpDesk :

Teams: [HelpDesk_Google Gemini Enterprise Program](#)

Google Chat: <https://chat.google.com/room/AAQACZZGI4Y?cls=7>

Daily Query Clarification Sessions :

2 30 PM - 3 30 PM (IST)

[Clarify your Queries to Learn & Complete Google Gemini Certifications | Meeting-Join | Microsoft Teams](#)

9 PM- 10 PM (IST)

[Clarify your Queries to Learn & Complete Google Gemini Certifications | Meeting-Join | Microsoft Teams](#)
